INFOTACT SOLUTIONS

Standard Operating Procedures for Intern Projects

Version 1.1 | Team-Based Execution | Mandatory GitHub Compliance

- ✓ **Title**: Team Project Guidelines – 2 out of 3 Projects (4 Week-wise Implementations)
- ✓ **Program Start Date**: 5th of every month
- ✓ **Duration per Cycle**: 2 Months (Month 1: Project 1, Month 2: Project 2)
- ✓ **GitHub**: Mandatory for all domains except Figma
- ✓ **Team Size**: [To be specified by Infotact Solutions]

1. PROJECT SELECTION (TEAM BASIS)

Rule	Description
Projects to Complete	Each team must complete any 2 projects out of 3 available projects.
Project Allocation	Project 1 will be completed in Month 1Project 2 will be completed in Month 2
Project Structure	Every project is divided into 4 week-wise implementations.
Team Contribution	All team members contribute to both selected projects.

- ➢ **Week-wise Implementation Breakdown (For Each Project)**

Week	Phase
Week 1	Implementation Phase 1
Week 2	Implementation Phase 2
Week 3	Implementation Phase 3
Week 4	Implementation Phase 4

2. MONTHLY TIMELINE (1 MONTH CYCLE)

Month 1: Project 1

Month	Period	Activity	Project Focus
Month 1	5th to 4th of next month	Full project work (4 weeks)	Project 1
Month 2	5th to 4th of following month	Full project work (4 weeks)	Project 2

Detailed Month 1 Schedule (Project 1)

Date Range	Week	Activity
5th to 11th	Week 1	Project 1 - Implementation Phase 1
12th to 18th	Week 2	Project 1 - Implementation Phase 2
19th to 25th	Week 3	Project 1 - Implementation Phase 3
26th to 4th (next month)	Week 4	Project 1 - Implementation Phase 4

Detailed Month 2 Schedule (Project 2)

Date Range	Week	Activity
5th to 11th	Week 1	Project 2 - Implementation Phase 1
12th to 18th	Week 2	Project 2 - Implementation Phase 2
19th to 25th	Week 3	Project 2 - Implementation Phase 3
26th to 4th (following month)	Week 4	Project 2 - Implementation Phase 4

3. REVIEW STRUCTURE (TEAM-BASED)

Two reviews are conducted **in EVERY monthly cycle** (once for Project 1 and once for Project 2). Both reviews are for the entire team.

3.1 Mid Review (For Each Project)

Parameter	Detail
When	Between the 20th and 27th of the month.

What is Checked	Week 1 + Week 2 implementations of the current project.
GitHub Requirement (Team)	During the 14 days leading up to the Mid Review, each team member must demonstrate individual project progress on a minimum of **10 different days**. Daily progress may include development work, documentation, testing, design updates, research, or other assigned project activities.
Commit Rule	Commits can be made by any team member. The requirement is based on collective team activity in the shared repository.
Example	If the Mid Review is conducted on the 22nd, the team repository must show commits on at least 10 different days between the 9th and 22nd.

3.2 Final Review (For Each Project)

Parameter	**Detail**
When	Between the 5th and 10th of the next month.
What is checked	Week 3 + Week 4 implementations of the current project.
GitHub Requirement (Team)	During the 20 days leading up to the Final Review, each team member must demonstrate individual project progress on a minimum of **20 different days**. Progress may include development, documentation, testing, UI/UX work, research, debugging, or other assigned project activities.
Commit Rule	The team must have at least one commit every single day in that 20-day period (no gaps allowed).
Individual Fallback	If a team member is unresponsive, remaining members continue. The 20-day commit rule still applies.

3.2.1 Review Schedule Summary

Review	**Month 1 (Project 1)**	**Month 2 (Project 2)**
Mid Review	20th to 27th of Month 1	20th to 27th of Month 2
Final Review	5th to 10th of Month 2	5th to 10th of Month 3

3.2.2 Review Scoring Criteria

Criteria	Weight
Implementation Completion (Week 1-4)	40%
GitHub Commit Discipline	30%
Code Quality & Documentation	20%
Team Collaboration	10%

3.2.3 Monthly Performance Evaluation

The internship stipend will be determined based on the intern's **project implementation, viva performance, review attendance, social media submissions, and mandatory GitHub working-day activity**.

The evaluation score will be calculated out of **70 marks**. In addition, the required **GitHub working days are mandatory for stipend eligibility** and will not be included in the 70 marks.

3.2.3.1 Monthly Evaluation Structure

Evaluation Criteria	Maximum Marks	Weightage
Mid-Project Review – Project Evaluation	20	28.57%
Mid Viva – Technical Evaluation	5	7.14%
Mid-Project Review – Attendance	5	7.14%
Mid Review – Social Media Video	5	7.14%
Final Project Review – Project Evaluation	20	28.57%
Final Viva – Technical Evaluation	5	7.14%
Final Project Review – Attendance	5	7.14%
Final Review – Social Media Video	5	7.14%
Total Evaluation Score	**70**	**100%**

3.2.4 Review-wise Evaluation

3.2.4.1 Mid-Project Review – 35 Marks

Component	Marks
Project Implementation & Progress	**20**
Mid Viva / Technical Evaluation	**5**
Mid Review Attendance	**5**
Mid Review Social Media Video	**5**
Total	**35**

3.2.4.2 Mid-Project Review Evaluation

The mid-project evaluation will assess:

- Completion of assigned Week 1 and Week 2 tasks
- Frontend implementation
- Backend/API development
- Database integration
- Functionality of implemented modules
- Individual contribution
- Understanding of the project architecture
- Technical explanation during the **Mid Viva**

3.2.4.3 Final Project Review – 35 Marks

Component	Marks
Final Project Implementation	**20**
Final Viva / Technical Evaluation	**5**
Final Review Attendance	**5**
Final Review Social Media Video	**5**
Total	**35**

3.2.4.3.4 Final Project Review Evaluation

The final evaluation will assess:

- Completion of all assigned project requirements
- Frontend and backend integration
- Database implementation
- API functionality
- Advanced features
- Code quality and project structure
- Individual contribution
- Deployment and working demonstration
- Technical understanding during the **Final Viva**

📊 Overall Score Calculation

Evaluation Stage	Marks
Mid-Project Review	35
Final Project Review	35
Total Score	**70**

Stipend Eligibility

- ✓ **Minimum Required Score: 45/70**
- ✓ **45/70 = 64.29%**
- ✓ However, the expected performance benchmark is:
- ✓ **75% = 52.5/70 → approximately 53/70**

Score	Percentage	Performance	Stipend Status
60–70	85.71–100%	Excellent	Eligible
53–59	75.71–84.29%	Expected/Good	Eligible
45–52	64.29–74.29%	Minimum Eligible	**Eligible**
0–44	Below 64.29%	Below Requirement	**Not Eligible**

3.2.5 Scorecard Release Timeline

Internship Month	Evaluation / Activity	Scorecard
Month 1	Project progress, Mid Review, Mid Viva, attendance and social media submission	Released **before the 20th of the following month**
Month 2	Project progress, GitHub working days, review activities and required submissions	Released **before the 20th of the following month**
Month 3	Final project, GitHub working days, Final Review, Final Viva and final submissions	Released **before the 20th of the following month**

Important Note:

The scorecard will be released before the 20th of the following month. Interns must ensure that all required project work, GitHub activity, review participation, viva, and social media submissions are completed within the communicated timelines.

Failure to complete mandatory requirements may affect stipend eligibility even when the minimum score is achieved.

4. GITHUB MANDATORY RULES

4.1 Applicability Matrix

Domain	GitHub Mandatory?
Web Development	✅ YES
Python Development	✅ YES
Java Development	✅ YES
Data Science / ML	✅ YES
Data Analytics	✅ YES
Cybersecurity	✅ YES
Generative AI	✅ YES
UI/UX (Figma only)	❌ NO

All Other Domains	✅ YES

4.2 Branch Rules

Rule	Description
Main Branch	Used only for progress tracking. This contains the final merged code from all team members.
Individual Branches	Each team member must have their OWN dedicated branch (e.g., member-A, member-B).
Commit Requirement	Each individual member must show commit activity in THEIR OWN specific branch.
Merge to Main	The Team Lead is responsible for reviewing and merging individual branches into the main branch.
Solo Worker	If you are working alone on the project, you are allowed to commit directly to the main branch.

4.3 Team Commit Requirements Summary

Review Type	Days Considered	Minimum Commit Days (Team)	Individual Branch Requirement
Mid Review	Last 14 days	10 different days (any team member)	Each active member must have commits in their own branch.
Final Review	Last 20 days	20 days (every day, any team member)	Each active member must have commits in their own branch.

4.4 Individual vs Team Commit Rules

Scenario	Rule
All team members active	Each member commits to their own branch. The team meets the overall day requirement collectively.
Some members unresponsive	Active members continue committing daily to their own branches. Unresponsive members will show no commits.
Single active member (Solo)	The lone member commits directly to the main branch (no separate individual branch is required).

4.5 What Counts as a Valid Commit?

Valid Commits (✅)	Invalid Commits (❌)
Code changes	Empty commits
Documentation updates	Single character changes (gaming the system)
README file updates	Identical commits duplicated across days
Configuration changes	Auto-generated spam commits
Assets (images, icons, etc.)	Commits with no meaningful content
Merge commits	Commits not in your own branch (when in team mode)

5. DASHBOARD & PROGRESS TRACKING

5.1 Dashboard Access

Step	Action
Step 1	Infotact Solutions will provide login credentials for the dashboard.
Step 2	Wait for credentials to be shared via email or WhatsApp.
Step 3	Login to the dashboard using the provided credentials.
Step 4	Connect your GitHub repository to the dashboard.
Step 5	Your progress will be automatically tracked by the system.

5.2 Dashboard Features

Feature	Description
GitHub Integration	Connect your repository for automatic progress tracking.
Commit History View	See all commits from all team members and branches in one place.
Progress Dashboard	Visual representation of week-wise completion metrics.
Review Schedule	Mid and Final review dates with an active countdown timer.
Team Member Status	See which members are active or flagged as inactive.
Lag Report Submission	Submit lag reports directly from the dashboard interface.

6. TEAM RESPONSIBILITY & WORK POLICY

6.1 Team Rules

Scenario	Action Required
All team members responsive	Distribute work equally. Teams are designed for active collaboration.
One or more team members not responding	Remaining members must start working individually immediately. Do not wait for them.
Team member rejoins later	They can rejoin the project but cannot demand any rework from the active members.
Team completely inactive	Any single member can choose to continue individually and will be evaluated on an individual basis.

6.2 Communication Policy

Rule	Requirement

Communication Channel	Teams must maintain a dedicated channel (e.g., WhatsApp, Discord, Telegram).
Response Time	Members are expected to respond to project communications within 24 hours.
Unresponsive Definition	If a member fails to respond for 48 hours, they are officially considered unresponsive.

7. IF A TEAM MEMBER IS UNRESPONSIVE

7.1 Step-by-Step Process

Step	Action
Step 1	Try to contact the member via all available channels (phone call, message, email).
Step 2	Wait a maximum of 48 hours for a response.
Step 3	If there is still no response, inform Infotact Solutions (mentor/lead) and provide proof (screenshots).
Step 4	Remaining team members must continue working without the unresponsive member.
Step 5	Update the Work Distribution Document to reflect the revised task allocation.
Step 6	The unresponsive member will be officially marked as inactive and evaluated separately.

7.2 Important Notes

#	Note
1	The team's GitHub commit requirement does not reduce; active members must step up to cover all required commit days.
2	The unresponsive member cannot later claim team credit for work they did not contribute to.
3	The unresponsive member's branch will show no commits, which serves as the documentation for their inactive status.

8. SCENARIO EXAMPLES (TEAM-BASED)

Scenario	What Happens	GitHub Rule	Branch Rule
4-member team, all active *(Month 1 - Project 1)*	Team divides work equally.	Any member commits – team meets 10/20 day rule.	Each member commits to their own branch.
4-member team, 2 stop responding *(Month 1 - Project 1)*	Remaining 2 members continue.	Same 10/20 day rule applies – active members commit.	Only active members have branch commits.
4-member team, 1 leaves, 1 lags, 2 active *(Month 2 - Project 2)*	2 active members do all work.	Same rule – 2 members commit daily.	2 active members have branch commits.
Entire team inactive except 1 person	Single person works individually.	Single person commits daily (20 days for final review).	Solo worker commits directly to main branch.
Team misses 2 days of commits in final review period	Requirement failed.	Project will be marked incomplete.	N/A
All team members active but one forgets to commit to their branch	Individual member flagged.	Team commit requirement may still be met.	That member's branch shows inactivity.

9. ROLE OF TEAM LEAD (MANDATORY)

Each team must select a Team Lead with the following responsibilities:

Responsibility	Description
GitHub Repository Management	Ensure the repository is created, shared, and commits happen daily.
Branch Management	Ensure each team member has their own branch and is actively committing to it.
Work Distribution	Assign week-wise tasks to members for both Project 1 and Project 2.
Dashboard Integration	Ensure the team repository is connected to the project dashboard.

Communication	Ensure all team members respond to communications within 24 hours.
Lag Reporting	Submit the lag document if the team is falling behind schedule.
Inactive Member Reporting	Inform Infotact Solutions if a member is unresponsive for more than 48 hours.
Review Attendance	Ensure the entire team is present for mid and final reviews (both months).
Merge Management	Merge individual branches to the main branch for proper progress tracking.

10. IMPORTANT REMINDERS (TEAM VERSION)

#	Reminder
1	*GitHub is mandatory for all domains except UI/UX (Figma only).*
2	*Each team member must have their OWN branch and commit directly to it.*
3	*For Mid Review: The team repository must have commits on at least 10 different days.*
4	*For Final Review: The team repository must have commits on all 20 days (no gaps allowed).*
5	*If a team member is unresponsive for 48 hours → report them and continue without them.*
6	*Teams are for helping and collaboration – not for tracking or dependency.*
7	*Dedicated GitHub sessions are available – attend them together as a team.*
8	*Reviews happen only between given date ranges (20th–27th for mid, 5th–10th for final).*
9	*The team must complete 2 projects out of 3: Project 1 in Month 1, Project 2 in Month 2.*
10	*The Work Distribution Document must be submitted before the Mid Review of Month 1.*
11	*Dashboard credentials will be provided by Infotact Solutions – please wait for them.*

12	*Connect your GitHub repository to the dashboard for automated progress tracking.*
13	*Solo workers can commit directly to the main branch (no separate individual branch needed).*
